

# OneStreet Digital

We are a web application development company that designs and develops effective solutions.

Let us be the architects of your vision.

## WEB APPLICATIONS

Working closely with multiple clients in varying industries, including automotive, finance, media, non-profit and telecommunications, we've built a wide range of successful web applications, such as:

- Content management systems (CMS)
- E-commerce modules
- Custom reporting, analytics
- Product management tools

Our philosophy is to promise only what can be delivered successfully, and provide our clients direct access to the people that will be doing their work.

## LOYALTY SOLUTIONS

Our specialty lies in helping our clients with their sales incentive programs and employee retention strategies. We partner with them to build a proper infrastructure that facilitates the deployment, management and tracking of their sales and incentive programs.

Our web portals also assist in campaign execution and fulfillment, allowing our clients' existing business processes to continually improve.

By providing online strategic branding principles, we not only help strengthen our clients' brand, we also give them the tools to extend their programs to other business units in a cost-effective manner.

OneStreet Digital's tools and expertise can help you provide innovative and cost-saving solutions for your new and existing loyalty and incentive programs. We can provide full turnkey solutions that include pre-paid VISA cards with your company branding to expedite and automate rewards.
